Tohoku University President,
Hideo Ohno

大野英男

Tohoku University is celebrating its 115th anniversary in 2022. This year, we also commemorate the 100th anniversary of our development into a comprehensive university, which came about following the establishment of the Faculty of Law and Letters. Tohoku University was established in 1907 with the support of expectant citizens, companies, and local government, and our mission has always been to return the fruits of our research to society. Under the principles of “Research First”, “Practice-oriented Research and Education”, and “Open Doors”, we have consistently made progress together with society. At this very moment, Tohoku University is at a turning point, one at which we look forward to transforming our future society.

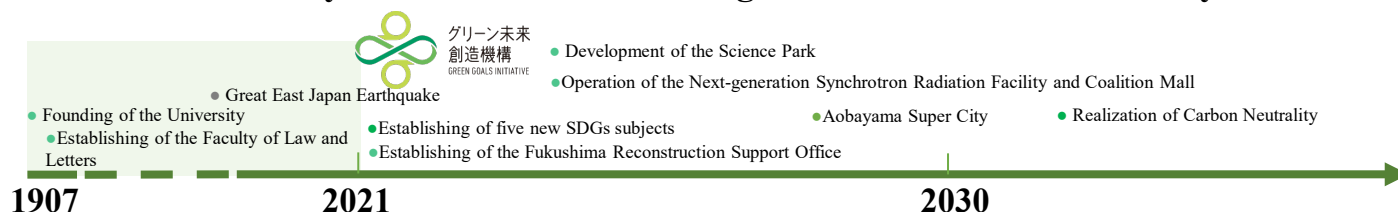

Based on the wealth of knowledge we have accumulated as a comprehensive university, we have been leading the recovery from the Great East Japan Earthquake for more than ten years. In 2021, we announced our ‘Green Goals Initiative’, through which we will use our experience and knowledge to solve issues common to all of society, such as the SDGs, the Great Reset, and carbon neutrality. This is our next step on the path to the realization of a prosperous future society.

At this turning point, the 115th anniversary of our founding, we have set goals for the future expansion of the Tohoku University Fund. It will help us pass on all of the assets that we have amassed so far and also help us realize the sustainable development of our world-leading research and education. Donations to the fund provide the university with the stability and sustainably necessary for us to carry out our activities. They are a manifestation of the expectations of everyone in society, and they are our greatest motivation.

We humbly request your support as we strive to realize a spiritually rich and sustainable future society through the creation of outstanding research results and the cultivating of eminent leaders at Tohoku University.

Tohoku University Green Goals Milestones

Tohoku University’s Initiatives for Realizing a Sustainable Future Society

How the fund will be used

Our aim is for Tohoku University to become a truly world-class university that will be a leader in creating a prosperous future society

Your support will be used by Tohoku University to fund the development of talented individuals, the generation of outstanding research results, and the creation of rich social values in collaboration with society.

Key Policy 1 Bringing comprehensive knowledge to the world and into the future

- Develop talented individuals with a global perspective who will be leaders for the next generation
- Further strengthen the global network
- Realize diversity within the research environment
- Preserve, pass on, and share historical assets with society

Key Policy 2 Education and Research for the Realization of a Green Future Society

Education

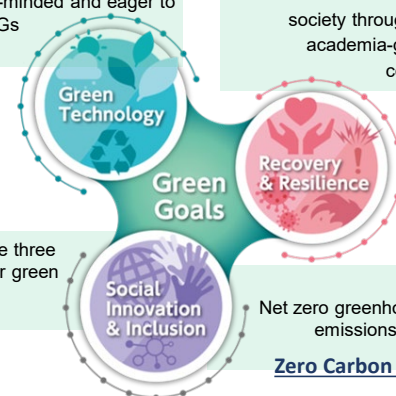

Development of talented individuals who are green-minded and eager to realize the SDGs

Community Collaboration

Realization of a resilient society through industry-academia-government collaboration

Promotion of the three priority areas for green technology

Research

Net zero greenhouse gas emissions by 2040

Zero Carbon Campus
