

**José Yagüe-Fabra** is a Professor at the University of Zaragoza (Spain), and since 2019 he serves as the Dean of the School of Engineering and Architecture. His research work is focused on precision design, micro-nano metrology, machine tool metrology, large scale precision engineering, and computed tomography. He is a Fellow of the CIRP, a council member of the euspen, and a member of several scientific societies such as SME. He is a member of international scientific committees in several conferences and an editorial board member of several journals in the field of Manufacturing and Metrology. One of his main interests is the international cooperative work with other professionals of the Precision Engineering field.
