

**Robert Gao** is the Cady Staley Professor and Department Chair of Mechanical and Aerospace Engineering at Case Western Reserve University in Cleveland, Ohio. His research on signal transduction mechanisms, multi-resolution signal analysis, and artificial intelligence/machine learning has led to the invention of multi-physics sensors and advanced signal processing methods for manufacturing process monitoring and control. He has published 3 books, over 450 technical papers, and received 13 patents. He is a Fellow of CIRP, ASME, SME, and IEEE, and a recipient of the ASME Milton C. Shaw Manufacturing Research Medal, ASME Blackall Machine Tool and Gage Award, SME Eli Whitney Productivity Award, IEEE Instrumentation and Measurement Society Technical Award, IEEE Best Application in Instrumentation and Measurement Award, and was named one of the *20 Most Influential Professors in Smart manufacturing*. He served as Chair of the Scientific Committee of the North American Manufacturing Research Institute (NAMRI/SME) and Chair of the CIRP Collaborative Working Group on AI in Manufacturing.
