

After earning a Ph.D. at UC Berkeley, Prof. **Sangkee Min** went to Japan as a special professor at Keio University. He returned to the US for a medical venture opportunity. He joined DTL Corporation (DMG Mori's US R&D) to develop an ultra-precision 5-axis nano machine. He worked for Lawrence Berkeley National Laboratory as a staff scientist. Finally, he is currently working at the Department of Mechanical Engineering at the University of Wisconsin-Madison as an associate professor with researching ultra-precision machining, smart sustainable manufacturing, and manufacturing for design.
