EDUCATION

Osaka University

Doctor of Philosophy (Ph.D.) in Quantum Physics

Osaka, Japan

Apr. 2015 – Mar. 2018

University of Science

Master of Science (M.Sc.) in Theoretical and Mathematical Physics

HCMC, Vietnam

Oct. 2012 – Jun. 2014

University of Education

Bachelor (B.Ed.) of Education Physics

HCMC, Vietnam

Oct. 2007 – Jun. 2011

EXPERIENCE

Assistant Professor

Frontier Research Institute for Interdisciplinary Sciences, Tohoku University

Apr. 2022 – Present

Sendai, Japan

- Studying quantum foundation, quantum metrology, and quantum tomography.
- Studying quantum computing and its application to these above topics.

Postdoctoral Researcher

Research Institute of Electrical Communication, Tohoku University

Apr. 2020 – Mar. 2022

Sendai, Japan

- Investigated uncertainty principle of quantum measurements.
- Investigated the uncertainty in sequential measurements under prediction and retrodiction.
- Quantum-enhanced quantum metrology and quantum state tomography using Neural Network.
- Developed toolbox for quantum measurement and others.

Postdoctoral Researcher

Kindai University

Apr. 2018 – Mar. 2020

Osaka, Japan

- Developed and applied the direct state measurements to reconstruct unknown quantum states and evaluate the statistical errors and systematic errors.
- Applied the Neural Networks with TensorFlow programming package to supervise the experimental data to reconstruct the quantum state.
- Investigated various types of quantum metrology to enhance the sensitivity of the estimation process.
- Studied the quantum-enhanced metrology using post-selection measurements for both single and multiple parameters estimations.
- Studied magnetic sensors in noisy environments using NMR systems.
- Verified fundamental quantum physics with superconducting circuits.

Student Research Assistant

Osaka University

Oct. 2014 – Mar. 2015

Osaka, Japan

- Researcher quantum information and quantum computation: quantum gates and quantum circuits such as NOT gate, Controlled-NOT gate,....
- Currently, supervise students to perform these quantum circuits in the IBM-Q with the python programming package Qiskit.

Researcher

Ho Chi Minh City Institute of Physics, VAST

Jan. 2012 – Sep. 2014

Hochiminh, Vietnam

- Investigated electronic structures of two-dimensional materials.
- Investigated the topological phase and quantum transport properties of two-dimensional materials.

PROJECTS

Grants-in-Aid for Scientific Research (KAKENHI):

Nonlocal quantum metrology based on entanglement and weak measurement Apr. 2020 – Mar. 2022

- Developed nonlocal measurements for quantum metrology.
- Investigated quantum errors and disturbance in sequential measurements.

Grants-in-Aid for Scientific Research (KAKENHI):

Characterization of systematic errors in direct quantum state measurements Apr. 2019 – Mar. 2020

- Investigated the systematic operational errors in the direct state measurements (DSM) with a quantum controlled interaction framework.
- Characterized the errors caused by various methods when measuring quantum states directly.
- Applied machine learning technique with a standard supervised learning procedure for quantum state tomography.

National Foundation for Science and Technology Development (NAFOSTED): Apr. 2019 – Mar. 2020

- Investigate the topological phase and quantum transport properties of two-dimensional silicene using first-principle and tight-binding methods.

SKILLS

Programming Languages: Python (expert), Fortran (expert)

Language: Vietnamese (native), English (fluent), Japanese (beginner)

Teaching skill:

Supervising: supervised some Master students in Japan and Vietnam

SCHOLARSHIP AND AWARDS

2020-2022: JSPS Postdoctoral Fellowship for Foreign researchers.

2015-2018: MEXT Scholarship for Ph.D. candidate.

2014-2015: MEXT Scholarship for research student.

PUBLICATIONS

Book:

1. Le Bin Ho (editor), *Hilbert spaces: Properties and Applications*, Nova Science Publisher (2020).

Reprints:

1. Le Bin Ho, *Stochastic parameter-shift rule for quantum metrology with general Hamiltonians*, arXiv: 2204.01055v1 (2022).
2. Le Bin Ho, *Quantum uncertainties in sequential measurements under prediction and retrodiction*, arXiv: 2204.01053v1 (2022).

Journal articles:
