

**Zhiyu Zhang** is a Research Professor of CIOMP. He received his bachelor's and master's degrees from Jilin University and his doctorate from Tohoku University of Japan. His research interests focus on the micro/nanofabrication by both diamond cutting and optical methods such as laser direct writing. He has been working for more than 15 years on ultraprecision cutting and corrective polishing, both on hard-and-brittle and soft-and-ductile materials. He has also developed various technologies on the fabrication of CGHs for optical mirror testing. He has authored/co-authored more than 100 journal papers and one invited book chapter in the aforementioned fields.
