

Our project overview

This R&D project aims at establishment of basic technologies for a portable ICT platform (movable ICT unit), which enables us to rapidly deploy it to disaster areas and recover ICT service. **Our goal is to offer ICT services (Telephone, etc.) to tens of thousands users in disaster area by deploying the platform within 2 days since the disaster occurrence.**

課題イ) The R&D for the configuration method for fast and flexible ICT functions recovering with Movable ICT units (Fujitsu, NTT)

課題ウ) The R&D for Movable ICT Unit system management (NTT, Tohoku Univ.)

Network Facility Layer

IU: Mobile ICT Resource Unit

課題ア) The R&D for designing Movable ICT Unit and the fast recovery methods (NTT, NTT Communications, Fujitsu, Tohoku Univ.)
